

Call for Papers

We are pleased to announce a **Call for Papers** for an upcoming **Thematic Issue** of *Rasayan Journal of Chemistry*, entitled:

“Indian Knowledge Systems for Chemical and Environmental Sustainability”

Indian knowledge systems, developed through long-term interaction with the environment, offer valuable insights into sustainable practices, natural resource management, green chemistry, traditional materials, and environmental conservation. This thematic issue aims to provide an interdisciplinary platform to explore, document, and scientifically evaluate the relevance and applications of indian knowledge in contemporary chemical and environmental science research.

Scope of the Thematic Issue (illustrative, not limited to):

- Indigenous practices related to chemistry, materials, and environmental processes
- Traditional methods in water purification, soil management, and waste treatment
- Ethnochemistry and traditional chemical formulations
- Indigenous knowledge in environmental sustainability and climate resilience
- Scientific validation of traditional and indigenous practices
- Integration of indigenous knowledge with modern chemical and environmental sciences
- Green Chemistry and Environmental Sustainability

We invite **original research articles, review papers, and short communications** that fall within the scope of this thematic issue. All submissions will undergo the journal's standard **peer-review process**.

Submission Guidelines:

- Manuscripts should be prepared as per the author guidelines of *Rasayan Journal of Chemistry*
- Submissions must be made through the journal's online submission system.
- Please mention **“Thematic Issue on Indian Knowledge”** in the Subject Line and Cover Letter at the time of submission.

We encourage you to circulate this call among your colleagues and research networks. Your valuable contributions will help advance scholarly discourse on the integration of indigenous knowledge with modern scientific frameworks.

For any queries related to this thematic issue, please feel free to contact us. Looking Forward.

With Kindest Regards,

Dr. Sanjay Sharma, FRSC
